Professional Summary

AI Engineer and Data Enthusiast with hands-on experience building **machine learning pipelines, LLM-powered applications, and scalable backend systems**. Skilled in **Python, FastAPI, MLflow, and Large Language Model integrations (Gemini, Groq)**. Experienced in developing AI-driven platforms for recruitment, cybersecurity, and career guidance.

Education

Panipat Institute of Engineering & Technology

B.Tech Computer Science and Engineering (Artificial Intelligence & Machine Learning)

CGPA: 7.66

June 2023 – June 2027

Projects

CareStance: AI-Powered Career Assessment Platform

GitHub | Live

- Developed an **AI-powered career guidance platform** using FastAPI enabling students to discover suitable career paths through structured assessments.
- Designed a **4-phase AI assessment pipeline** including personality archetype classification, scenario-based evaluation, and AI-driven career recommendations.
- Built an **LLM-based career chatbot** using Gemini and Groq APIs with Redis caching, streaming responses, and conversation memory.
- Implemented **Razorpay-based counsellor booking and Jitsi Meet video consultations** along with an admin dashboard and support ticket management system.

HireWise: AI-Powered Recruitment Platform

GitHub | Live

- Built an **AI-driven recruitment platform** for automated technical interviews and candidate performance analysis.
- Implemented **LLM-based question generation using Google Gemini** and automated evaluation using Groq Llama 3.3 70B.
- Developed an **async video interview system with AI proctoring** and recruiter dashboard for candidate assessment.
- Tech Stack: Python, FastAPI, SQLite, SQLAlchemy, Gemini API, Groq LLM, MediaPipe.

Network Security: Phishing Detection System

GitHub

- Built an **end-to-end machine learning pipeline** for phishing attack detection using network traffic data.
- Implemented data ingestion, preprocessing, feature engineering, and model training using Scikit-Learn.
- Integrated **MLflow experiment tracking** and Docker-based containerization for reproducible ML workflows.
- Tech Stack: Python, Scikit-Learn, Pandas, MongoDB, MLflow, Docker.

Technical Skills

Programming:	Python, SQL, JavaScript
Machine Learning:	Scikit-Learn, TensorFlow, Model Evaluation
AI / LLM Tools:	LangChain, FAISS, Gemini API, Groq, Ollama
Backend Development:	FastAPI, REST APIs
Frontend:	Streamlit, HTML, CSS, Tailwind
Databases:	MySQL, SQLite, SQLAlchemy, MongoDB
MLOps:	MLflow, Docker
Libraries & Tools:	Pandas, NumPy, Matplotlib, Git, GitHub, VS Code

Achievements

- Solved **300+ problems on LeetCode**, strengthening problem-solving skills in data structures and algorithms.
- Achieved **416 GitHub contributions in the last year**, actively building and maintaining AI and machine learning projects.
- Selected as a **Smart India Hackathon (SIH) participant**, collaborating in a national-level innovation competition.

Certifications

- Data Analytics Internship – Global Grades (Sep 2024)
- Data Science and Machine Learning Internship – The BrainHub (Aug 2025)
- Machine Learning A-Z – Udemy (Sep 2025)
